SCMS

SCHOOL CHILD MONITORING SYSTEM

v1.18.1 · Feb 2026

Run a real school. Not a spreadsheet farm.

Multi-tenant SaaS for K-12 schools — attendance, marks, fees, HR & payroll, parent comms in 8 Indian languages. Strict role-based access. WhatsApp/Telegram-first alerts. Per-tenant database isolation. Docker one-liner deploy.

283	31	8	6	FREE	1-cmd
Backend tests	Tenant collections	Languages	Roles	WhatsApp + Telegram	Docker deploy

Onboarding & RBAC

Platform admin onboards schools. ONE Super Admin per school. 6 roles, every endpoint scoped. Wrong-role at login is blocked + cookie cleared.

Subscription Approval & Lockdown

New schools request approval with a child-count. Until approved, sidebar shows only Dashboard + Subscription (HTTP 423). Approval = full unlock.

Per-child Billing

■30/child/month or ■300/child/year (~16% off). Live quote from active students. Auto-expiry guard + 7-day Telegram/WhatsApp renewal nudge.

Attendance & Marks

Mobile swipe-card attendance with auto WhatsApp alerts. Per-subject marks; publishing fires multilingual notifications to every parent.

HR & Finance

Teachers + accounts + non-teaching staff (cleaners, drivers, security, coaches). Expenses + teacher reimbursement workflow. One-click Monthly Payroll PDF.

Platform Compliance

Read-only dashboard comparing each school's approved vs actual student count. Filter `over_capacity` for billing reconciliation & capacity planning.

Multilingual Alerts

Meta WhatsApp Cloud (FREE 1000/mo) → Twilio fallback → Telegram → Email. 8 Indian languages baked in. Parent override beats school default.

Sick Leaves & Risk Flags

Multi-day sick leaves with medical cert upload. Recurring-illness widget (≥3 in 90 days). Predictive risk scoring highlights at-risk students.

Audit, PDFs & Bulk Excel

Audit log with filters + UTF-8 CSV export. ReportLab receipts + student academic report. Excel bulk-upload for students/attendance/holidays.

PRICING

■30 / child / month

■300 / child / year (≈ 16% saving)

Live quote from your active student count. No setup fee. No lock-in.

WHY SCMS

- FREE-first messaging (Meta WhatsApp Cloud, Telegram, SMTP)
- Strict per-tenant DB isolation — clean GDPR boundary
- Production hardened: 283 pytest cases, JWT brute-force throttle
- Idempotent seeds; 1-command Docker deploy with seeded demo

Try it in 90 seconds

```
git clone <your-repo> scms  &&  cd scms  &&  docker compose up --build
```

Seeded with the DEMO school (Sunrise Public School, code DEMO) — 144 students, 3 teachers, 1 accounts, 8 parents, ready to click around.
